Dear Members of IAEA,

We received good news from Goldsmith College, London, with plans to establish a new research center in empirical aesthetics. Further down you will find two job adverts. Many of us are looking forward to the special issue that Paul Silvia is going to organize for Psychology of Aesthetics, Creativity and the Arts.

We wish you a successful autumn!

As usual, For additional information please see our website http://www.science-of-aesthetics.org. Also of you have any suggestions for the website or the association, please let us know.

On Behalf of IAEA

Helmut Leder
President
Conference
Please see the Deadlines of TEAP in Dresden 2017; and the 125th Annual Convention of the American Psychological Association in Washington (http://www.apa.org/news/events/2017/apa-convention.aspx)

Recent Publications in Empirical Aesthetics

Articles

**Books**

Gerald Cupchik announces the publication of his book *The Aesthetics of Emotion: Up the down staircase of the mind-body* (Cambridge University Press, 2016). He applies aesthetic theory, research and developments in neuroscience to integrate opposing viewpoints about the nature of emotion, interviews a curator and nine artists about their projects, and explores the origins of "cave art" in brain and social
developments more than 30,000 years ago. Members of IAEA and others are invited to visit a dedicated website where they can find nine Open Access lectures (about 20 minutes each) as well as interviews with the artists, and other resources including a transcript of Dan Berlyne's autobiographical interview from 1973. The URL is: [http://www.utsc.utoronto.ca/publications/aestheticsofemotion](http://www.utsc.utoronto.ca/publications/aestheticsofemotion)

Lecturer in Psychology (two posts)
The Department of Psychology, Goldsmiths, University of London is looking to appoint two excellent researchers to the position of Lecturer in Psychology for January 2017 or as soon as possible thereafter. As well as pursuing an independent programme of research, the post holders will contribute to teaching across a range of modules primarily on our undergraduate and postgraduate programmes, and to administrative roles in the department.

We are particularly keen to appoint a candidate who can attract significant grant income, whose research shows clear pathways to impact, and who can complement existing research strengths in our Cognitive and Clinical Neuroscience, Development and Education Science and The Psychology of Aesthetics and Performance research groups. We also have more focal areas of specialism in Anomalistic Psychology, Forensic Psychology, Health and Well-Being, and Social Relations and Groups.
